PROJECTS

E-Farming

E-Farming is a digital platform connecting farmers with buyers. It provides real-time market insights. Smart tools help in better crop management. Farmers get fair pricing and improved profits.

Designed a PHP, HTML, CSS, and MySQL-based platform to connect farmers with buyers and improve agricultural trade.

Rent A Coder

Rent A Coder connects businesses with skilled developers for on-demand, high-quality, and cost-effective coding solutions.

Developed a Python-Django-based marketplace for freelancers and clients

IPL Score Prediction

The IPL Player Score Prediction app leverages machine learning to forecast individual player performances based on past stats and match conditions.

Built a model using Python and ML algorithms to predict IPL match outcomes based on historical data.

CERTIFICATES

- NASA INTERNATIONAL SPACE APP
- WORDS PER MINUTE
- PYTHON
